- **Blockchain-** Algorand, WalletConnect, Smart Contracts, crypto, algosdk
- **Skills-** Front-End & Back-End Development, Unit Testing, Microservices Architecture, CI/CD Pipelines, Blockchain Development, Algorand

Experience

Quokka Labs LLP

Software Engineer L2

Aug 2023 - Present

Noida, Uttar Pradesh

- Developed scalable mobile applications using React Native and Flutter.
- Designed architecture for social media apps and crypto apps to ensure seamless user experience.
- Conducted comprehensive testing and debugging of mobile applications, ensuring high quality and stability.
- Conducted code reviews and mentored junior developers on coding standards.

Singsys Software Services Pvt Ltd

Software Engineer

Sep 2020 - Aug 2023

Lucknow, Uttar Pradesh

- Architected and developed distributed mobile applications using React Native and scalable web applications using React.js.
- Automated software delivery through integrated CI/CD pipelines, ensuring faster and more reliable releases.
- Created unit, integration, and E2E tests for robust QA.
- Maintained documentation for development and handovers.

Education

Babasaheb Bhimrao Ambedkar University (A Central University) Lucknow

- ❑ MCA with 8.25 CGPA

Aug 2017- Sept 2020

Dr. Ram Manohar Lohia Avadh University, Ayodhya

- ❑ BCA with 71.33%

July 2013- Oct 2016

Open Source and Libraries

- **@harshithkishor/git-commit**
 - Automates Git commit workflows with customizable templates and validation
 - Ensures consistent commit standards while streamlining the development process
- **@harshithkishor/rn-responsive**
 - React Native package for building responsive, adaptive UI layouts
 - Ensures consistent design and usability across all device sizes

Projects

- **Collate – Multi-service Booking App**
 - A service booking app for various needs such as laundry, telecommunications, electricity, air conditioning, handyman services, and cleaning.
 - Unified platform for customers and merchants with quick/preferred bookings and subscriptions.
- **Jasiri Wallet - Algorand Blockchain Wallet**
 - Feature-rich non-custodial wallet with offline support and Algorand token trading.
 - It enables access to the JASIRI Protocol for tokenizing purchases and unlocking capital.
 - Connect to dApps securely using WalletConnect
- **SWI (Singapore Watch Insider) - Marketplace for luxury watches**
 - A marketplace for bidding on high-end luxury watches with real-time chat.
 - Engage directly with sellers to negotiate bids. Complete your purchase upon agreement.
- **Suntec+ Eats - Food Delivery Platform**
 - Separate apps for merchants and customers with live order tracking.
 - Supported both self-collection and merchant-managed delivery options
- **StarFarm - Music Streaming Platform**
 - Transparent and immutable platform for artists and streamers
 - Provides high-quality music accessible seamlessly on web and mobile devices
 - Enables discovery and support of artists with full transaction transparency and immutability
- **Shivam Yoga Studio**
 - Developed both mobile application and admin panel
 - On-demand video and live yoga class app with e-commerce features.
 - Allows users to subscribe to live classes or purchase monthly plans
- **Jumper AI (Vonage) - Conversational Commerce Platform**
 - Developed using Flutter for a cross-platform, seamless mobile experience
 - Jumper AI is a conversational commerce platform enabling businesses to sell products directly through chat and social media
 - Facilitates automated customer engagement and order management within messaging apps
 - Designed to help brands boost sales and streamline customer interactions across multiple channels
- **Other Projects**
 - **TripTrap** - Established the base app architecture, and integrated real-time communication using Socket.io.
 - **IGym and IGym Trainer** - Upgraded the codebase with the latest Flutter packages and managed the project publishing process.
 - **aiTriage** - Developed a scalable admin panel and RESTful web services using Nx workspace to support medical triage workflows.
 - **WayWay (SixTnc)** - Built the admin panel and backend services; implemented real-time updates using Socket.io for enhanced user engagement.
 - **OT Tracking** - Tracks live employee location with geofencing alerts triggered upon entry or exit of designated areas
